

## PRESS RELEASE

VBN Components AB  
2013-10-04

### The founders of VBN Components have been awarded the **SKAPA Development Award**, the most well-known invention price in Sweden.

The founders of VBN Components AB have been awarded the SKAPA Development Award, which is the most well-known invention price in Sweden. The award was presented by the famous inventor **Håkan Lans** the 3rd of October 2013, in Stockholm Concert Hall.

"-By additive manufacturing, a paradigm shift has been implemented for component manufacturing. The technique to build components directly from metal powders results in minimal number of processing steps, low material waste and great opportunities to shape complex tools."

The SKAPA Development Award was instituted in memory of the inventor **Alfred Nobel**. The purpose of the award is to provide assistance to inventors so they can transform their products / services to commercial opportunities. (Please also visit <http://www.stiftelsenskapa.se/> (in Swedish))

Ulrik Beste and Martin Nilsson receive the SKAPA Development Award from Mr Håkan Lans, Oct 3d, in Stockholm Concert Hall.
